

# TUN WAI LIN

## MECHANICAL ENGINEER

### CAREER OBJECTIVE

Mechanical Engineer with hands-on experience in building M&E systems and site operations. Skilled in AutoCAD, Revit, and practical maintenance of mechanical and electrical systems. Strong field knowledge with growing experience in engineering design and technical coordination.

### WORK EXPERIENCE

#### Junior M&E Engineer | SP Engineering Service

- Supported the execution of M&E systems for 3+ building projects, assisting in labour coordination and hands-on tasks. Managed on-site labour for a team of workers.
- allocating daily tasks to ensure project milestones were met. Prepared daily progress reports for senior engineers, ensuring clear communication and adherence to project timelines. Gained practical, hands-on experience assisting with the installation electrical, and plumbing components. Contributed to ensuring all on-site work complied with company standards and project specifications.

#### Maintenance Engineer | Atrium Condo, Yangon

- Perform daily inspection and preventive maintenance of generators, transfer pumps, booster pumps, and other building M&E systems to ensure continuous operation.
- Monitor and maintain plumbing and sanitary systems, including service tanks, storage tanks, and water distribution lines. Coordinate with local government electricians and external contractors for transformer installation, electrical works, and system upgrades.
- Conducted troubleshooting of mechanical and basic electrical faults, ensuring minimal downtime of residential building systems. Maintained technical records, maintenance logs, and coordinated corrective actions to ensure systems comply with operational and safety standards.
