HUNCH with NASA

Project Intern during high school

League City, Texas

Aug 2019 – May 2021

- Tasked to come up with solutions for ISS-related issues with certain requirements that were going to be judged and processed for Phase 2 by NASA engineers and mentors.
- Tasked with an issue where a payload needed to reenter the earth's atmosphere without burning up, to fit in small spaces, and collect data as it reenters. Using electronics and materials that had a high temperature tolerance and lighter weight capacity.
- Redesign to Launch. A team was formed to take previous projects that made it to Phase 2. Updating them and making a polished prototype that makes it to the manufacturers for the ISS. Working with NASA mentors and receiving feedback that met the requirements of the improved designs.

Rewards

Inclusive Engineering Consortium 2to4 Scholarship

Aug 2023 - Present

Rewarded: 8,000, and 3,000 annually.

- The Inclusive Engineering Consortium is a non-profit organization comprised of historically minority serving institutions working as one to advance the Electrical and Computer Engineering (ECE) enterprise. The IEC is organized as a "super department" of diverse faculty, staff, and students with broadly-based strengths in education, research, scholarship, and service. The overall goal of the Consortium is to produce a larger and better prepared pool of African-American, Hispanic, and Native American ECE graduates.
